**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8-11 and 14-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8, 9 and 15 recite the limitations "said adjacent second friction-lining segment" and "said first friction-lining segment". There is insufficient antecedent basis for these limitations in the claims.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6, 7 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Berger.

Berger discloses a friction lining segment (21) with a lock mechanism (4) arranged on one end and/or with a lock counter-mechanism (22) arranged on the other end characterized in that at least one hole (28) is provided in the vicinity of the lock mechanism and/or in the vicinity of the lock counter-mechanism. (Figure 6)

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berger.

Re claim 13, Berger does not teach wherein the counter-lock mechanism is cut essentially perpendicular to a fiber direction. It would have been an obvious matter of design choice to have aligned the fiber directions perpendicular to the counter-lock mechanism since applicant has not disclosed that having the fibers at any specific angle solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with the fibers at any angle.

***Allowable Subject Matter***

7. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 8-11, and 14-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

9. Applicant's arguments filed February 7, 2005 have been fully considered but they are not persuasive.

Applicant argues that Berger does not teach the claimed limitations. It is the examiner's position that applicants arguments are more specific than the claim language. Though the structure of applicant's invention differs from that of Berger, as broadly claimed, the claimed limitations are disclosed and the rejection is maintained. Further, upon further consideration, claim 3 is rejected above.
